

COSC2325-001 Course Syllabus

Title: Computer Architecture and Machine Language
Instructor: Roie R. Black
Term: Summer 2017 (9 week)
Synonym: 26111
Start Date: May 30, 2017
website: <http://www.co-pylit.org/classes/spring2017/cosc2325-001>

Basic Course Information

Course Description:

The organization of computer systems is introduced using assembly language. Topics include basic concepts of computer architecture and organization, memory hierarchy, data types, computer arithmetic, control structures, interrupt handling, instruction sets, performance metrics, and the mechanics of testing and debugging computer systems. Embedded systems and device interfacing are introduced

Course Prerequisites:

Two semesters of programming or department approval.

Students usually have passed COSC1336 and COSC1337 before taking this course.

Required Text:

Author(s)	title	ISBN	Publisher
Patterson and Hennessy	Computer Organization and Design	978-0-12-801733-3	Elsevier

Instructor Information

Name	Roie R. Black
email	rblack@austincc.edu
Phone	512-223-3199
Office	Rio Grande - 3251 (Gym)

Class meetings

Event	Day	Time	Room
lecture	TTh	5:15pm - 8:15pm	HLC1-2412
Lab	MW	8:20pm - 10:00pm	HLC1-2412

Office Hours

Day	Time	Room
TTh	3:00pm-5:00pm	HLC1-2412 or open lab
Sat	10:00am-12:00pm RGC3-3251 (by appointment only)	

On Saturdays, I hold RoboLab sessions where we work on course hardware, and robot projects. I also offer help with personal system setup issues. If needed I can be available up to 2:00pm, when the campus closes. If no one shows up before noon, I may leave then, unless you have made an appointment.

Instructional Methodology:

This course will have 6 hours of lecture and 3.5 hours of lab per week. If the students are unable to finish the assigned lab work within the lab time, they will need to visit the CIS open labs. Teaching methodology will be to use a hybrid approach utilizing traditional in-class lectures and lab sessions coupled with distance-learning techniques utilizing computers and the Internet. The students will be expected to use the lab workstations for all homework submissions. Submission techniques will be taught during the first few lectures. No homework will be accepted through any submission channel except through the class lab workstations! Exams will be given in class.

Course Rationale:

This course is required as part of the Associate of Applied Science degree.

Degree Plans:

- This course will transfer in some form to other colleges.

Learning Outcomes/Course Objectives:

1. Explain contemporary computer system organization.
2. Describe data representation in digital computers.
3. Explain the concepts of memory hierarchy, interrupt processing, and input/output mechanisms.
4. Measure the performance of a computer system.
5. Design and develop assembly language applications.
6. Explain the interfaces between software and hardware components.
7. Explain the design of instruction set architectures.
8. Develop a single - cycle processor.
9. Explain the concept of virtual memory and how it is realized in hardware and software.
10. Explain the concepts of operating system virtualization

Note

In this course, we will also explore tools all modern developers should be able to use. Specifically, we will use *virtual machines* and *source code control systems* for class projects.

Scans Competencies:

Maintained in Computer Studies office (RGC1-113)

Grading Policies

Grading Policy:

Grade will be based both on concepts and practical application. Exams, quizzes and homework assignments may be a part of the grade. An overall grade will be assigned based on the following grading scale:

Percentage	Letter Grade
90%-100%	A
80%-89%	B
70%-79%	C
60%-69%	D
0%-59%	F

Point Values:

Item	Points
Orientation Quiz	50
Exams (2)	200 ea = 400
Labs (~9)	20 ea = 180
Homework (~10)	10 ea = 100
Group Projects (2)	100 ea = 200
Class participation	70
Total	1000

Lab grade computation:

Compile with no errors	15 percent
Run with no errors	15 percent
Produce correct output	20 percent
Algorithm design	20 percent
Follow recommended style guidelines	15 percent
Includes documentation	15 percent

Each homework or lab project is due one week following the class in which the task is assigned. (For distance students, the assignment date will be Sunday of the week the assignment is posted.) Late assignments will be accepted for one week with a late penalty of 20%. Any work received more than one week after the due date will receive at most 50% of the possible grade. Scheduling of computer time outside of regular lab time is the student's responsibility. Availability of computers is NOT an excuse for being late with any assignment. The last date to submit assignments for consideration this semester is May 14.

General Class Policies

Attendance Policy:

For on-campus courses, attendance will be taken during each lecture session. You are expected to attend classes regularly. If you miss a class, you are still responsible for any material covered in that class.

Class Preparation:

Students are expected to read and study the assigned material, per the course schedule, BEFORE each class.

Scheduling Computer Time

Scheduling of computer time outside of regular lab time is the Student's responsibility. Availability of computers is NOT an excuse for being late with a lab project assignment.

Testing Policies:

All courses will require that you take tests to verify that you have learned the material being presented. For this class, your exams will be written, short answer problems: I will provide a printed test with space for you to write your answer. You are not allowed to use any other paper for your answers.

Unless specifically told otherwise, all tests are closed-book tests. I do allow using any reference materials for lab assignments associated with a test, but there will be a time limit to complete the work.

Missed Exams

Missed EXAMS must be made up no later than the next scheduled class period. Exams can be missed only for extreme circumstances (Example: hospitalization). Please contact the instructor IN ADVANCE if you will miss one of the exams. There are NO make up exams for un-excused absences. Only one exam may be taken as a make up exam.

Incomplete Grade:

A student may receive a temporary grade of **I** (Incomplete) at the end of the semester only if ALL of the following conditions are satisfied:

1. The student is unable to complete the course during the semester due to circumstances beyond their control.
2. The student must have earned at least half of the grade points needed for a **C** by the end of the semester.
3. The request for the grade must be made in person at the instructor's office and necessary documents completed.
4. To remove an **I**, the student must complete the course by two weeks before the end of the following semester. Failure to do so will result in the grade automatically reverting to an **F**.

School Policies

Academic Integrity

A student is expected to complete his or her own projects and tests. Students are responsible for observing the policy on academic integrity described in the Current ACC Student Handbook, under "Student Discipline Policy, Section C".

Freedom of Expression:

It is expected that faculty and students will respect the views of others when expressed in classroom, or in discussion groups on class websites or Blackboard.

Prohibited Acts :

Acts prohibited by the college for which discipline may be administered include scholastic dishonesty, including but not limited to cheating on an exam or quiz, plagiarizing, and unauthorized collaboration with another in preparing outside work. Academic work submitted by students shall be the result of their own thought, research or self-expression. Academic work is defined as, but not limited to tests, quizzes, whether taken electronically or on paper; projects, either individual or group; classroom presentations, and homework.

Students with Disabilities:

Each ACC campus offers support services for students with documented physical or psychological disabilities. Students with disabilities must request reasonable accommodations through the Office for Students with Disabilities on the campus where they expect to take the majority of their classes. Students are encouraged to make this request three weeks before the start of the semester. (Refer to the Current ACC Student Handbook) "Communications"

Please let me know as soon as you can (before the need arises) that you need accommodation. I will work with you to make sure you can get this course done as effectively as possible.

Communications

Note

For most of my courses, I post lecture materials, and assignments on my class website. Navigate to [Roie Black's ACC Website](#) to find links for your class. For some of my courses lecture materials and assignments will be found on Blackboard. Grades for all classes will be posted on Blackboard.

The ACC online Blackboard system ([Blackboard](#)) and the ACC e-mail accounts will be used as the official communication system during this semester. Lecture notes, handouts, changes to course schedule or assignments and your grades will be posted on Blackboard and all email communication will be via the ACC e-mail accounts. All students are expected to check both Blackboard and their ACC e-mail accounts on a regular basis. For information on how to log onto Blackboard and ACC e-mail, please visit the following sites:

- [Student Support](#)
- [Student Email](#)

Safety Statement

Each student is expected to learn and comply with ACC environmental, health and safety procedures and agree to follow ACC safety policies. Emergency posters and Campus Safety Plans are posted in each classroom. Additional information about safety procedures and how to sign up to be notified in case of an emergency can be found at [Emergency Notifications](#).

Anyone who thoughtlessly or intentionally jeopardizes the health or safety of another individual will be immediately dismissed from the day's activity, may be withdrawn from the class, and / or barred from attending future activities.

Testing Center Policy(Open Campus sections only)

The academic testing center is to be used for regular testing of open campus students only. All other sections will use the classroom time for regular testing and the testing center may be used to administer make-up tests.

Privacy Policy:

The information stored on your student drives in the lab may be viewed by the instructor or lab technicians for academic and educational reasons.

Dishonesty:

For this course, the penalty for scholastic dishonesty is a grade of **F** for the course.

Withdrawal Policy:

Regular and punctual class and laboratory attendance is expected of all students. If attendance or compliance with other course policies is unsatisfactory, the instructor may withdraw students from the class.

It is the student's responsibility to complete a Withdrawal Form in the Admissions Office if they wish to withdraw from this class. The last date to withdraw for this semester is Jul 18, 2017. It is not the responsibility of the instructor to withdraw the students from their class even though the instructor has the prerogative to do so under the above listed circumstances.

Tentative Class Schedule

Week	Dates	Topic	Lab	Reading
1	5/31	Course Introduction	Lab Setup	1.1-1.5
		History Lesson		Notes
	5/1	Orientation Exam	HW1	Syllabus
		A Peek at Assembly	Lab1	Notes
		Von Neumann Machines		Notes
		Performance	HW2	1.6
2	6/6	Number systems	HW3	
		Machine Language	Lab2	
		Coding Instructions		
	6/8	Decisions		
		Procedures		
		Input/Output		
3	6/13	Doing Math	Lab3	
	6/14	Review for Exam 1		
4	6/20	Exam 1	Ex1 Lab	

... continued on next page

Week	Dates	Topic	Lab	Reading
		Processor Design		
	6/22	Hardware Design Languages		
		Pipelining	Lab4	
5	6/27	Pentium&ARM		
		Assembly Language		
	6/29	Memory Heirarchy	Lab5	
		Caches		
6	7/4	Independence Day		
	7/6	Virtualization	Lab6	
		Group Project 1 Demos		
		Review for Exam 2		
7	7/11	Exam 2	EX2 Lab	
		Embedded Systems	Lab7	
	7/13	Timers		
8	7/18	Pulse Width Modulation		
	7/19	Motor Control	Lab8	
9	7/25	Interrupts		
	7/27	Multitasking	Lab9	
10	8/1	Group Project 2 Demos
